MAYO CLINIC

Mayo Clinic Speakers Bureau

"We make house calls!"

Mayo Clinic is dedicated to innovative patient care, research and education. We use a team approach, giving patients access to many different specialists as needed. Because we are a tertiary care center, most of our physicians have in-depth knowledge of specific diseases and new treatment and research breakthroughs.

The Mayo Clinic Speakers Bureau connects your organization with Mayo physicians and staff willing to share their expertise on a wide variety of topics. You can choose from a list of our popular topics or allow us to customize the talk to meet your needs. There's no charge for the speaker. It's part of our commitment to share our knowledge for a healthier community. For more information or to schedule a speaker, call us at (904) 953-0745 or visit us online at www.mayoclinic.org/community-events-jax/. Please allow at least three weeks to process your request.
