Intro with music	GIVING YOU THE EDGE ON HEALTHY LIVING, HERE'S MAYO CLINIC'S MEDICAL EDGE.
	WHILE IT MAY LOOK AND ACT LIKE A PACEMAKER, THE NEW VBLOC MEDICAL DEVICE IS DESIGNED TO HELP YOUR WAISTLINE, NOT YOUR HEART. HOW? BY SENDING VERY MILD ELECTRICAL SIGNALS TO THE VAGUS NERVE.
Michael Camilleri, M.D.	"IT'S VERY MUCH LIKE A JAMMING SIGNAL WHICH PREVENTS THE NORMAL REFLEX PROCESSES THAT OCCUR WHEN WE EAT A MEAL, FROM OCCURRING."
	YOU FEEL FULL SOONER AND LONGER. MAYO CLINIC DR. MICHAEL CAMILLERI HELPED

	DEVELOP THE IMPLANTABLE VBLOC. IN A RECENT STUDY, PARTICIPANTS LOST AN AVERAGE OF 15 PERCENT OF THEIR EXCESS WEIGHT. A FEW LOST MORE THAN 30 PERCENT.
Dr. Camilleri	“THIS IS THE LEVEL OF WEIGHT LOSS WHICH WE KNOW IS ASSOCIATED WITH DIABETES AND OTHER COMPLICATIONS OF OBESITY BECOMING MORE EASY TO MANAGE.”
	MORE STUDY IS NEEDED, BUT THE VBLOC MAY PROVE AN EFFECTIVE AND LESS INVASIVE ALTERNATIVE TO BARIATRIC SURGERY
	FOR MORE INFORMATION, TALK TO YOUR DOCTOR OR VISIT MAYOCLINIC.ORG. I'M VIVIEN WILLIAMS.
