

Genotype	Optimal Regimens
1	<p>GLE/PIB 8 wks</p> <p>a-TE with PEG/RBV, no cirrhosis 8 wks</p> <p>b-Cirrhosis and TE with non-NS5A DAA 12 wks</p> <p>c-ESRD 12 wks</p> <p>d-Post-LT <u>without</u> cirrhosis and KT 12 wks</p> <p>e-Not for post-LT or decomp</p>
	<p>SOF/LDV 12wks</p> <p>a-Naive, noncirrhotic, non-African-American, and <math>&lt;10^6</math>copies 8 wks</p> <p>b-Decomp cirrhosis, or NS3A/PI+PEG-IFN/RBV TE with cirrhosis, or post-LT, add RBV*</p> <p>c-SOF/RBV TE, add RBV 12 wks, if cirrhosis, add RBV 24 wks</p>
	<p>SOF/VEL 12 wks</p> <p>a-Decomp cirrhosis, add RBV*</p> <p>b-Decomp cirrhosis, and SOF or NS5A failure, add RBV 24 wks</p>
	<p>EBV/GZV 12 wks</p> <p>a-In G1a check RAVs to NS5A, if + 16 wks</p> <p>b-NS3A/PI+PEG-IFN/RBV TE, add RBV, and if +RAVs to NS5A 16 wks</p> <p>c-ESRD 8-16 wks (depending on stage/treatment history)</p> <p>d-Not for post-LT or decomp</p>
	<p>SOF/VEL/VOX TE DAA failures 12wks</p> <p>a-G1a non-NS5A failures 12 wks</p> <p>b-Not for post-LT with cirrhosis or decomp</p>
2	<p>GLE/PIB 8 wks</p> <p>a-TE with PEG/RBV, no cirrhosis 8 wks</p> <p>b-Cirrhosis and TE with non-NS5A DAA 12 wks</p> <p>c-ESRD 8-16 wks (depending on stage/treatment history)</p> <p>d-Post-LT <u>without</u> cirrhosis and KT 12 wks</p> <p>e-Not for post-LT or decomp</p>
	<p>SOF/VEL 12 wks</p> <p>a-Decomp cirrhosis, add RBV</p>
	<p>SOF/VEL/VOX TE DAA failures 12 wks</p> <p>a-G1a non-NS5A failures 12 wks</p> <p>b-Not for post-LT with cirrhosis or decomp</p>
3	<p>GLE/PIB 8 wks</p> <p>a-Cirrhosis and TE with non-NS5A DAA 12 wks</p> <p>c-ESRD 12-16 wks (depending on stage/treatment history)</p> <p>c-Post-LT <u>without</u> cirrhosis and KT 12 wks</p> <p>d-Not for post-LT or decomp</p>
	<p>SOF/VEL 12 wks</p> <p>a-TE with PEG-IFN/RBV without cirrhosis 12 wks</p> <p>b-Naive and TE with PEG-IFN/RBV with cirrhosis 12 wks (if Y93H RAS negative)</p> <p>c-Decomp cirrhosis, or PEG-IFN/RBV or SOF/RBV TE, add RBV</p>
	<p>SOF/VEL/VOX 12 wks</p> <p>a-TE with NS5A 12 wks (consider RBV if cirrhosis)</p>

	b-Naive and TE with PEG-IFN/RBV with cirrhosis 12 wks (if Y93H RAS positive) b-Not for post-LT with cirrhosis or decomp
	SOF/ EBV/GZV 12 wks a-TE with PEG-IFN/RBV with cirrhosis b-Not for post-LT or decomp
4	GLE/PIB 8 wks a-TE with PEG/RBV, no cirrhosis 8 wks b-Cirrhosis and TE with non-NS5A DAA 12 wks c-ESRD 8-16 wks (depending on stage/treatment history) d-Post-LT <u>without</u> cirrhosis and KT 12 wks e-Not for post-LT or decomp cirrhosis
	SOF/LDV 12 wks a-Decomp cirrhosis, add RBV* b-PEG-IFN/RBV TE and cirrhosis, add RBV* c-SOF TE, add RBV
	EBV/GZV 12 wks a-ESRD 12 wks b-Not for post-LT or decomp
	SOF/VEL 12 wks a-Decomp cirrhosis, add RBV* b-SOF or NS5A TE, add RBV 24 wks
	SOF/VEL/VOX for TE DAA failures 12 wks a-Not for decomp or LT with cirrhosis
5, 6	GLE/PIB 8 wks a-TE with PEG/RBV, no cirrhosis 8 wks b-Cirrhosis and TE with non-NS5A DAA 12 wks c-ESRD 8-16 wks (depending on stage/treatment history) d-Post LT without cirrhosis and KT 12 wks e-Not for post-LT or decomp
	SOF/LDV 12 wks a-SOF TE 24 wks add RBV b-Post-LT, add RBV c-Decomp, add RBV
	SOF/VEL 12 wks a-If decomp, add RBV* b-If DAA failure extend to 24 wks add RBV
	SOF/VEL/VOX for TE DAA failures 12 wks a- Not for decomp or LT with cirrhosis
