

October 2019

Patient Care

[Timely diagnosis and treatment essential for optimal treatment of idiopathic intracranial hypertension](#)

At Mayo Clinic's cerebral spinal fluid dynamics clinic, patients can see a neurologist and neuro-ophthalmologist, have diagnostic testing, and see a neurosurgeon, if needed, within a few days.

Research

[Study expands applicable epidemiological data on conjunctival tumors](#)

While most conjunctival tumors are benign with low risk of malignant transformation, researchers recommend subspecialty referrals in the setting of changing appearance or worrisome features.

[TAPS supports use of intraocular lenses in infants between 7 and 24 months of age](#)

The Toddler Aphakia and Pseudophakia Study (TAPS) evaluated concerns about adverse events, re-operations and refractive changes in infants who receive intraocular lens implantation for cataract.

[Patients at increased risk of ischemic stroke in the peri-CRAO period](#)

Research supports that there is an increased risk of stroke around the time of central retinal artery occlusion (CRAO), especially if an embolic

etiology of CRAO is diagnosed.
