

# Clinical Physician Update

August 2022

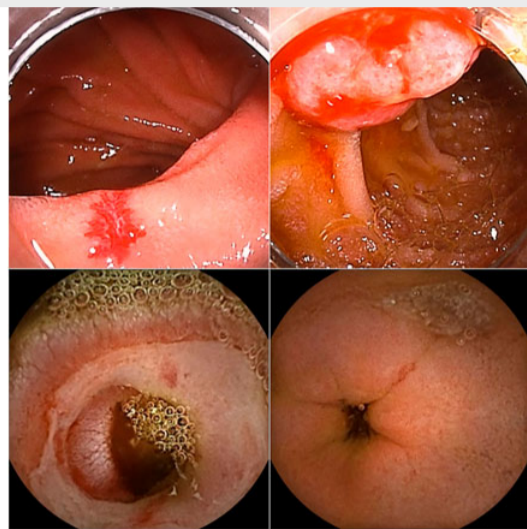

## Patient Care

### Improving care for traumatic brain injury

Mayo Clinic physicians use the Mayo Classification System for Traumatic Brain Injury Severity to evaluate numerous criteria from loss of consciousness duration to post-traumatic amnesia in adults with traumatic brain injury.

### How to evaluate and manage small bowel bleeding

According to Mayo Clinic researchers, a patient's age and comorbidities should be considered when assessing the etiology of small bowel bleeding. Management begins with an assessment of hemodynamic stability.

### New therapies to treat pediatric epilepsy

At the forefront of managing pediatric seizure conditions, Mayo Clinic physicians target the underlying causes of pediatric epilepsy so that innovative treatment can begin earlier in a patient's life.

### Spinal anesthesia for pediatric urologic surgeries

The pediatric urology team at Mayo Clinic worked with their pediatric anesthesia colleagues to pursue alternative anesthesia options to avoid general anesthesia for select patients undergoing pediatric urologic procedures.
