Patient Care

Managing inflammatory bowel disease with capsule endoscopy: Gastroenterologists at Mayo Clinic discuss current trends and future use of capsule endoscopy as an effective tool for the diagnosis and management of inflammatory bowel disease.

Safely scanning patients with implanted devices: The multidisciplinary MRI team at Mayo Clinic works with referring clinicians to design protocols that allow safe scans for patients with implanted devices to reach the correct diagnosis.

Evaluating pediatric patients at risk of sudden cardiac death: New guidelines help primary care physicians and pediatric cardiologists identify and treat patients at risk of sudden cardiac death.

Research

A Mayo Clinic study documented fewer surgical complications and shorter hospital stays for individuals having pituitary tumor surgery at Mayo compared with results from a multicenter study.
