Patient Care

Multidisciplinary care and specialized training for rectal cancer

Colorectal cancer surgeons at Mayo Clinic are advancing treatment options by using multidisciplinary teams subspecialized to complex cancers. These teams advance care options and research to improve rectal cancer.

Cutting-edge technology enhances management of movement disorders

Mayo Clinic neurologists have extensive experience with the treatment of complex movement disorders. Innovations in diagnosis and deep-brain stimulation (DBS) can potentially improve outcomes.

New testing and treatments offered at the dry eye clinic

Mayo Clinic's new dry eye clinic offers new imaging and treatment options, along with comprehensive, multidisciplinary care.

Total knee replacement technology developments

Mayo Clinic Orthopedic Surgery has committed to innovations in technology for patients who need total knee replacements.
