Patient Care

Enhanced proton beam therapy better targets AVMs

Mayo Clinic uses proton stereotactic radiosurgery to manage arteriovenous malformations (AVMs). This technology precisely targets AVMs while sparing healthy tissue.

Perinatal care offers an ideal time to screen for cervical cancer

For pregnant patients, cervical cancer risk can be glossed over and delay diagnosis — contributing to 40% of patients who are diagnosed without prior screening. Pregnancy offers a unique opportunity where screening can be optimized.
