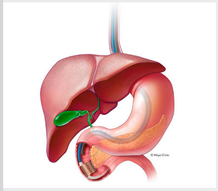
Research

Researchers explore possible link between immune system dysregulation and the pathophysiology of idiopathic gastroparesis

By profiling the human gastric muscle immunome in patients with idiopathic gastroparesis, researchers observed macrophage-driven changes and distinct patterns of human gastric muscle immune cells.

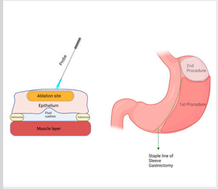
Learn more



Evaluating the clinical safety and efficacy of novel endoscopic treatment for type 2 diabetes

Mayo Clinic gastroenterologist Andrew C. Storm, M.D., answers questions about the use of endoscopic re-cellularization via electroporation therapy (ReCET) in individuals with difficult-to-control type 2 diabetes.

Learn more



Taking a closer look at small bowel endoluminal bariatric and metabolic therapies

Mayo Clinic gastroenterologist Dilhana S. Badurdeen, M.B.B.S., M.D., discusses the duodenojejunal bypass sleeve, duodenal mucosal resurfacing, pharmacological duodenal exclusion therapy, duodenal mucosal electroporation therapy and gastric mucosal ablation.
