Endocrinology Physician Update
April 2024

Patient Care
Advancing the treatment of patients with skeletal disorders
New bone probe indicates bone health metrics, helping medical professionals adopt a more comprehensive approach to a patient’s bone health diagnosis and monitoring.

Research
Identifying patients with the highest chances of achieving remission after transsphenoidal surgery
Results from a retrospective analysis helped clinicians design a scoring system to predict biochemical remission after surgical management of GH-secreting adenomas.

Treating type 1 diabetes in the early stages
According to a recent study, a new immune-modulating therapy helps slow the rate of islet cell loss for people in the early stages of type 1 diabetes.

Education
Mayo Clinic School of Continuous Professional Development offers live courses, livestreaming courses, online continuing medical education (CME) courses and podcasts to meet your CME needs.
