Research

Hidden causes of myocardial infarction in younger adults

In a new JACC study, Mayo Clinic cardiovascular researchers found that causes of myocardial infarction in patients age 65 and under are not often because of atherosclerosis. This is especially true for women.

How PH and RV dysfunction impact tricuspid valve surgery outcomes

A Mayo Clinic cardiac surgeon explains the importance of early intervention on the tricuspid valve before the development of right ventricular dysfunction or pulmonary hypertension. The retrospective study was published in JTCVS Open.
