GENERAL INFORMATION

Course Description

Success With Failure: Heart Failure for Clinical Practice will feature up-to-date presentations on the evaluation and treatment of heart failure. New diagnostic tools, drugs, and devices will be reviewed along with their role in specific clinical situations. Integration of guidelines and clinical management will be highlighted. The program format includes didactic lectures, interactive case-based discussions, surgical and medical perspectives to ensure a lively and relevant educational opportunity for all participants.

A special optional session will be held for the ABIM Heart Failure Knowledge module to be presented in an interactive educational format. The content will enhance the competence and clinical judgment of heart failure care providers.

Course Highlights

- Heart Failure Re-Admission
- Heart Failure Prevention, Evaluation and Management
- Update in practice guidelines, performance measures and clinical research
- Contrasting medical and surgical perspectives
- Focus on heart failure with preserved ejection fraction
- Basic Mechanisms of Heart Failure
- Multimodality imaging in heart failure

Course Learning Objectives

Upon conclusion of this program, participants should be able to:

- Identify relevant features of national heart failure guidelines
- Analyze new treatments for heart failure including devices
- Characterize the timing and expected outcome for surgical interventions in heart failure patients including those with ischemic heart disease and valvular heart disease

Attendance at this Mayo course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.

Intended Audience

Success With Failure is appropriate for cardiologists, internists, cardiac surgeons, cardiac fellows, mid-level providers, and nurses providing care for patients with heart failure.
