

Ophthalmology Physician Update

December 2024

Patient Care

First FDA-approved retinal gene therapy now available

The first prescription retinal gene therapy product is now available at Mayo Clinic. For eligible patients, voretigene neparvovec-rzyl is a one-time gene therapy that has the potential to restore the visual cycle and to improve functional vision.

Prioritizing early intervention and research for pediatric myopia

Early intervention and detection in children with myopia is the key to reducing the long-term impact on a patient's ocular health. Mayo Clinic's pediatric myopia clinic offers coordinated care within a multidisciplinary team, research opportunities and access to specialized testing.
