Patient Care

Precision diagnosis is critical for timely, targeted therapy for MOGAD

Mayo Clinic offers the first coordinated, multidisciplinary clinic in the world that is devoted specifically to MOGAD, a rare antibody-mediated inflammatory demyelinating disorder.

Research

Keratoconus: Early intervention can halt progression

Growing global awareness, increased research, improved diagnostic capabilities, and expanding treatments have enabled earlier detection of keratoconus. This has led to therapies that can meaningfully reduce or even halt the progression of the disease.
