

# PM&R Physician Update

February 2022

## Patient Care

### **Shock wave therapy emerges as an effective treatment for musculoskeletal issues**

Physical medicine and rehabilitation specialists are using extracorporeal shock wave therapy to treat an evolving list of musculoskeletal and neurological diagnoses.

## Research

## SCIMS program designation supports clinical services, research efforts designed to improve patient outcomes

Mayo Clinic and three other Minnesota organizations collaborate in the Spinal Cord Injury Model Systems (SCIMS) program to enhance spinal cord injury care and research.

[Learn more](#)

## Providing rehabilitation services for patients receiving cancer treatment poses challenges

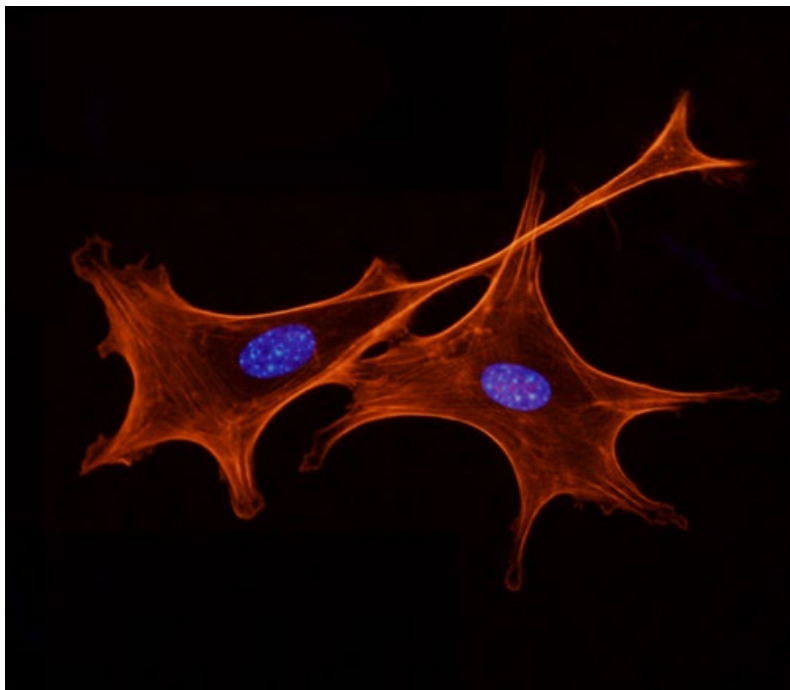

An electronic health record-facilitated cancer symptom control trial tests new approaches to identify and assess which patients need rehabilitation services and how to deliver appropriate care efficiently.

[Learn more](#)

## Studies paint clearer picture of factors that affect healing and repair after spinal cord injury

Mayo Clinic neuroregeneration and neurorehabilitation researchers continue to examine cellular and molecular mechanisms contributing to injury and repair processes in the central nervous system.
