

July 2021

## Patient Care

### [Use of third line therapies increasing for treatment of overactive bladder](#)

Referral to specialists may close a gap in care for women who do not have success with oral therapies for overactive bladder.

### [TeleEM service benefits Level III or IV trauma centers, critical access hospitals](#)

Mayo Clinic's TeleEM telemedicine service can provide extra help to medical facilities facing limited care team resources, unique cases, ambiguous direction for care, complex pharmacologics and equipment barriers.

### [Single-site robotic adrenalectomy provides surgeons with better depth perception, greater range of motion](#)

Single-site technology allows for adrenalectomy to be safely performed through a single 2.5-cm incision that accommodates the camera, an assist port and two working hands.

## Research

### [Updated best practices focus on reducing post-polypectomy bleeding](#)

Mayo Clinic gastroenterologist Neena S. Abraham, M.D., M.S., reviews research findings related to the use of antithrombotic agents,

polypectomy techniques and prophylactic placement of hemostatic clips and their impact on post-polypectomy bleeding.
