COVID-19 Updates

Find resources for providers and answers to questions on referrals and testing on the Medical Professionals Resource Center

Patient Care

**Treatment of chronic abdominal bloating and distension poses challenges**

Mayo Clinic gastroenterologists review the epidemiology, effects and pathophysiology of chronic bloating and distension and describe diagnostic strategies and available treatment options.

**Endoscopic ultrasound (EUS)-guided pancreatic anti-tumoral therapy**

**Mayo Clinic Proceedings goes fully digital for 2021**

Mayo Clinic Proceedings’ move to online-only access provides subscribers with access to new content and the ability to search content by specialty or subject area — plus connections to related multimedia.

Research

Successful innovators in medicine draw upon passion, persistence and patience
Mayo Clinic gastroenterologist Elizabeth Rajan, M.D., answers questions about the skills and processes that guide physician-investigators working on device and technology innovation.

Study shows increased incidence of esophageal adenocarcinoma in people under age 50
Mayo Clinic research examining the incidence, stage distribution and survival outcomes associated with esophageal adenocarcinoma (EAC) in a large population-based study yields some surprising results about young-onset EAC.

High levels of unsaturated fat in the diet and in visceral fat composition can worsen outcomes of acute pancreatitis in lean individuals
Study results explain the noted inverse correlation between body mass index and mortality, often termed the obesity paradox.
