Patient Care

[Nadofaragene firadenovec shows promise for treatment of patients with NMIBC](#)

In a phase III clinical trial, 53% of patients with nonmuscle invasive bladder cancer (NMIBC) in the carcinoma in situ cohort had a complete response within three months of treatment.

Research

[Preoperative stenting may not increase risk of UTUC relative to nephrostomy tube in patients with bladder cancer](#)

Research does not support increased risk of upper tract urothelial carcinoma (UTUC) in patients receiving preoperative ureteral stenting for hydronephrosis prior to cystectomy.

[Study explores factors associated with iatrogenic ureteral injury and health care litigation](#)

Multiple studies suggest that iatrogenic ureteral injuries, while uncommon, make up a disproportionate number of litigation claims. The specialties most commonly named are gynecology and urology.
