Patient Care

[Reconstructive approach improves quality of life for select patients with urosymphyseal fistula following prostatectomy](#)

Research supports that patients who develop posterior urethral stenosis and urosymphyseal fistula following salvage radiation after prostatectomy can achieve a durable restoration of quality of life.

[Use of third line therapies increasing for treatment of overactive bladder](#)

Referral to specialists may close a gap in care for women who do not have success with oral therapies for overactive bladder.

Research

[Pembrolizumab not cost-effective for treatment of BCG-unresponsive bladder cancer](#)

Research confirms that pembrolizumab at current pricing is not cost-effective for patients with bladder cancer that has proved unresponsive to bacillus Calmette-Guerin (BCG) treatment.
